

slatted bed

With its two runners, this slatted bed rests on the ground like a catamaran on water – dynamic and light. It is easy to pack up, so it is an ideal bed for working nomads and everyone who loves a change.

Minimal use of material and a highly efficient production are its main design features. The bed consists of just a few parts that can be assembled without any tools: Just place the slats on the runners, connect them with a sleeve and secure each one with a bolt. When dismantled, the slats can be stored in the runners, which serve as packaging.

The bed is made of a bent multiplex beech board and is available in three different widths. Enjoy the flexibility and fun of this ingenious product!
